

WORKSHOP ON ELECTRONIC MEDIA FOR COLLEGE STUDENTS OR WORKING PERSON

BVBFTS is providing practical training in the field of Electronic Media since year 2001. Today every TV Channel has professionals trained at BVBFTS. We have several Diploma and PG Diploma courses to offer practical training in different technical departments of TV Channels and TV Production Houses.

The career in Electronic Media is very exciting and satisfying. Before you join any full time long duration course, attend our 5 days practical workshop, so that you can understand your potential to make career in Film & Television. You will clear your all doubts related to scope and opportunities in Electronic Media.

If you are planning to join Post Graduation in Journalism at any premier institute such as MCRC of Jamiya, IIMC at JNU, or FTII at Pune, this training will definitely help you to perform better at entrance test of these institutions. Today there are several opportunities to work on freelance basis as Writer, Reporter of Print Media or making small Films for Social Media, students can learn and get such work with little efforts. Better join this workshop as early as possible before your college examination to ensure sure shot entry into career of Electronic Media.

BEST OF LUCK

This 5 days Practical Workshop will cover following topics:-

1. How Electronic Media is different from Print Media? Production tools used for Television i.e. cameras. Here students will observe different Still, Video and Digital Cameras used for TV Production, they learn about basic controls of camera.
2. Terminology and production process used for TV Production. Here students will learn about technical terms used while shooting, and they observe basic shooting technique using cameras and lighting.
3. Direction and Script Writing for Fiction and Non-fiction TV projects. Here students will learn to use right approach to write TV Script. Students will write Script for News Bulletin and Documentary.
4. Shooting of News Reading using Camera, Mic, Lights etc. in our Studio. Students will take part in News reading exercise.
5. Post Production of TV Project using sound recording and Non-linear Editing on Computer. Students will observe video editing of one sample project in-front of them.

This workshop will help students to understand work process at TV Channel and TV Production Studios. Students can start making their own short films using their amature video camera and edit on Laptop to upload on YouTube.
