Career Guidance

After 12th What?

Dear Student,

Congratulations for completing school education.

So far you have taken decisions without thinking and without analyzing situations, because all decisions were taken by your parents with their experience and looking at the family budget. Now you have grown up and you have to choose a career which you will enjoy maximum for rest of your life, and a career where you get placement as early as possible.

Let's look at usual trend of joining University's regular college for B.A., B.Sc., B.Com, etc after passing 12th.

Talk to your seniors or your relatives - who are in 3rd year of graduation or who have already completed graduation from college - and ask them....

- Are they happy with their subjects studied at Graduation?
- Are they sure about getting job immediately?
- Does College helps to get placement of their choice? OR
- They are simply thinking of continuing Post Graduation, as they have nothing else to do.

Critically analyze their answers and think, are you going to make same mistake as they have done it?
